R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

Question #1

Question #2

There are 9323 unique hospital IDs in the data.

Question #3

```
## # A tibble: 2 x 2
##   penalty price
##   <dbl> <dbl>
## 1      0  9752.
## 2      1 10235.
```

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
